Smart Trust®

FACT CARD

Value Architects Disciplined Core Portfolio Trust (2010 SERIES F)

A 2 YEAR UNIT INVESTMENT TRUST

Investment Objective

The Trust seeks to provide investors with the possibility of above-average total return (a total return that exceeds that of the S&P 500 Index over the life of the Trust). The Portfolio Consultant sought securities whose historical, fundamental profitability metrics have generally been superior to industry peers. There is no guarantee that the investment objective of the Trust will be achieved.

Strategy of Portfolio Selection

The Trust seeks to achieve its objective through investment in the publicly traded common stock of companies, closed-end investment companies (the "Funds") and Canadian income and/or royalty trusts or similar or related companies ("CITs"). The portfolio was selected by Value Architects Asset Management LLC (the "Portfolio Consultant"). The Portfolio Consultant selected Funds that invest primarily in fixed income securities of U.S. and/or foreign issuers. The Funds generally may invest in corporate and government debt obligations and other fixed income securities. Certain Funds invest in emerging markets and/or high yield, high risk bonds ("junk" bonds). The Portfolio Consultant selected CITs in the consumer discretionary, energy, health care and materials sectors. The Portfolio Consultant selected stocks of companies (other than the CITs and Funds) in the following sectors: consumer discretionary and staples, energy, financials, health care, industrials, information technology, materials and telecommunication services. These companies are diversified among large, mid and small capitalization companies. As used herein, the term "Securities" means the shares of common stocks of companies, CITs and Funds initially deposited in the Trust and contracts and funds for the purchase of such securities, and any additional securities acquired and held by the Trust pursuant to the provisions of the Trust Agreement.

Description of Portfolio

The portfolio of the Trust contains 53 issues of equity securities of domestic and foreign companies, including 5 CITs and 6 Funds (including Business Development Companies). 100% of the issues are represented by the Sponsor's contracts to purchase. Based upon the principal business of each issuer and current market values, the following sectors are represented by the common stocks of the companies and CITs in the portfolio (and does not include the Funds whose portfolios are not fixed): Consumer Discretionary, Consumer Staples, Energy, Financials, Health Care, Industrials, Information Technology, Materials and Telecommunication Services.

INCEPTION DATE:	October 26, 2010
TERMINATION DATE:	October 30, 2012
ROLLOVER DATE:	October 11, 2012
INITIAL OFFER PRICE:	$10.00
MINIMUM INVESTMENT:	500 units

(200 Units for purchases by custodial accounts or Individual Retirement Accounts, self-employed retirement plans (formerly Keogh Plans), pension funds and other tax-deferred retirement plans)

NUMBER OF ISSUES:	53
DISTRIBUTIONS:[1]	Monthly, if any
ESTIMATED NET ANNUAL DISTRIBUTION PER UNIT:	$0.4653
CUSIP (CASH):	831703731
CUSIP (REINVESTMENT):	831703749
FEE-BASED CUSIP (CASH):	831703756
FEE-BASED CUSIP (REINVESTMENT):	831703764
TICKER:	SMVABX

[1]Distributions, if any, will be made commencing on November 30, 2010. The estimated net annual distribution is expected to decline over time because a portion of the securities included in the portfolio will be sold to pay for organization costs. Distributions will fluctuate as a result of Unitholder redemptions in addition to securities being sold within the portfolio. Distributions are also subject to the ability of issuers to make dividend payments in the future.

Sales Charges[2] (based on a $10 public offering price):

STANDARD ACCOUNTS

Transactional Sales Charges:	Initial	1.00%
	Deferred	2.45%
Creation & Development Fee:		0.50%
Maximum Sales Charge:		3.95%

The deferred sales charge is a charge of $0.245 per unit and will be deducted in three monthly installments commencing on Feb. 20, 2011. Investors will not be assessed the initial and deferred sales charge for eligible fee-based accounts and must purchase units in a Fee CUSIP. Please see the prospectus for sales charge details.

FEE/WRAP ACCOUNTS[3]

Creation & Development Fee:	0.50%
Maximum Sales Charge:	0.50%

[2]Percentages are based on a $10.00 per unit offering price. For unit prices other than $10.00, percentages of initial sales charge, creation and development fee, and deferred sales charges will vary. Early redemption will still cause payment of the deferred sales charge. The table above shows the initial offering period sales charges only.

[3]The creation and development fee is a charge of $.050 per unit collected at the end of the initial offering period. If the price you pay exceeds $10 per unit, the creation and development fee will be less than 0.50%; if the price you pay is less than $10 per unit, the creation and development fee will exceed 0.50%.

Volume Discounts

PURCHASE AMOUNT[4]	SALES CHARGE
Less than $100,000	3.95%
$100,000 but less than $250,000	3.45%
$250,000 but less than $500,000	3.20%
$500,000 but less than $750,000	2.95%
$750,000 or greater	2.45%

[4]The volume discount is also applied on a unit basis utilizing a breakpoint equivalent in the above table of one unit per $10. Please see the Trust prospectus for full details. These discounts are only offered during the initial offering period.

CONTINUED ON BACK.

Investors should carefully consider the Trust's investment objective, risks, charges and expenses carefully before investing. The prospectus contains this and other information relevant to an investment in the Trust. Please advise your clients to read the prospectus carefully before they invest. Risk Considerations

An investor can lose money by investing in this Trust. The Trust is not actively managed and will not sell securities in response to ordinary market fluctuations. An investment in this unit investment trust is subject to market risk, which is the possibility that the market values of securities owned by the Trust will decline and that the value of Trust Units that you receive in connection with the Trust's termination or a redemption of your Units may therefore be less than what you paid for them. There is no guarantee that the Trust will meet its investment objectives, that the securities comprising the portfolio will pay dividends or that the unit price will not decline.

Closed-end funds are subject to various risks, including management's ability to meet the Fund's investment objective, and to manage the Fund's portfolio when the underlying securities are redeemed or sold, during periods of market turmoil and as investors' perceptions regarding the Funds or their underlying investments change. Unlike open-end funds, which trade at prices based on a current determination of the Fund's net asset value, closed-end funds frequently trade at a discount to their net asset value in the secondary market. Certain closed-end funds may employ the use of leverage which increases the volatility of such funds.

The Trust invests in units of Canadian income trusts or similar or related companies. The Trust's investment in CITs involves risks which may differ from an investment in common stock of a U.S. corporation. CITs may have different shareholder rights and obligations, do not guarantee minimum distributions or returns of capital and are subject to the risk that tax changes or recharacterizations will adversely affect the Canadian or U.S. tax consequences of owning such CITs. CITs tend to be heavily invested in real estate, oil and gas, pipelines and other infrastructure specific to the energy sector. As a result, negative developments in the energy sector will affect the value of your investment more than would be the case in a more diversified investment. Many income/royalty trusts are expected to convert to corporate entities, or may have already made such a conversion, prior to the application of the distribution tax beginning in 2011. The conversion of income/royalty trusts to corporations could have a material impact on the tax treatment of such companies, the current market value of the companies, and consequently, could impact the value of the Units of the Trust.

You will bear not only your share of the trust's expenses, but also those of the underlying funds. By investing in other funds, the trust incurs greater expenses than you would incur if you invested directly in the funds.

Certain Funds in the Trust portfolio may invest in securities that are rated below investment-grade and are considered to be "junk" securities. While these lower rated securities offer a higher return potential than higher rated securities, they also involve greater price volatility and greater risk of loss of income and principal and may be more sensitive to interest rate changes and more likely to receive early returns of principal. Certain Funds in the Trust may invest in securities that are rated as investment-grade by only one rating agency. As a result, such split-rated securities may have more speculative characteristics and be subject to a greater risk of default than securities rated as investment-grade by both Moody's and Standard & Poor's.

Share prices or dividend rates on the securities in the Trust may decline during the life of the Trust. There is no guarantee that the issuers of the securities will declare dividends in the future and, if declared, whether they will remain at current levels or increase over time. Inflation may lead to a decrease in the value of assets or income from investments.

An investment in a portfolio containing small-cap companies is subject to additional risks, as the share prices of small-cap companies are often more volatile than those of larger companies due to several factors, including limited trading volumes, products, financial resources, management inexperience and less publicly available information.

An investment in a portfolio containing securities of foreign issuers is subject to additional risks, including currency fluctuations, political risks, withholding, the lack of adequate financial information, and exchange control restrictions impacting foreign issuers. Risks associated with investing in foreign securities may be more pronounced in emerging markets where the securities markets are substantially smaller, less liquid, less regulated and more volatile than the U.S. and developed foreign markets.

The sponsor may offer successive Trusts with similar portfolios thereby allowing the investor to pursue the same strategy over a number of years. Investors should consider their ability to pursue investing in successive Trusts, if available. There may be tax consequences associated with investing in the Trust and rolling over an investment from one Trust to the next.
